Youth Services

The Holt Bolt was founded in 2013 by Richard Holt. The entire purpose of the Company and the Movement it represents is to create opportunities for people of all abilities and ages to achieve their goals.

Our mission is simple; to identify the talents of the people we work with and create pathways and opportunities for them to share their talents and passions with their community. There are several ways that we do this; primarily through our 1:1 Physical Training/Exercise Physiology sessions, 1:1 Support work and group based programs such as sport and BELLS.

We started with a dream of creating opportunities for Bolters to gain employment and have a meaningful life post school. We have achieved that dream and continue to create pathways for our Bolters into Jobs post school. We see our role in our Bolter's lives as Talent Identification - finding/discovering our Bolter's talents, amplifying them and helping them develop their areas of opportunity.

We carry out our talent identification process in two main ways - through our centres and our active support program. - Customised Employment Supports, including School Leavers Supports - Support Work - community based with a focus on becoming part of a team, creating employment connections, building social, communication and daily living skills. - Personal Training and Exercise Physiology - in a private, custom built gym. - Occupational Therapy - Starting in February 2023
